

July 28, 2020

Dear Community Member,

I would like to thank you for your patience during the closing the StoneCroft Aquatics Center (SCAC).

As you may know, we are a public bathing place; therefore, we have to follow guidelines set by the Centers for Disease Control (CDC) and PA Department of Health (DOH). With all of the guidelines and recommendations to follow, we have limited availability to open the pool for regular hours. Additionally, since SCAC is located in a Retirement Community, we need to remain cautious for the health and safety of our residents. With that being said, we will not co-mingle residents and community members at this time.

Several weeks ago, we opened the pool for limited hours for resident use only. We are ready to begin allowing community members limited use of the pool beginning Wednesday, August 5.

In order to ensure proper social distancing and safety, we will permit a maximum of six people in the pool and a maximum of two people in the spa at any given time. Reservations are required to use the pool and spa during open hours. Reservations will be required for a 30-minute time slot to use the pool and/or spa; one time slot can be reserved per day and reservations should not exceed two times/week.

Wednesdays

10:30-11am
11:15-11:45am

Thursdays

1:00-1:30pm
1:45-2:15pm
2:30-3:00pm
3:15-3:45pm

Fridays

10:30-11am
11:15-11:45am

To reserve your swim or spa time please contact Sandi Brandt or Gwynne Johnson at extension 2441. We will begin accepting reservations on Wednesday, July 29 at 8am.

Please note:

- Masks must be worn to/from the pool, but will not be required in the pool
- Equipment (noodles, weight, etc.) may be used and should be retrieved from the bins marked "clean"; once you are finished, please place in the bin marked "used"
- All equipment will be disinfected after each use by Tel Hai team members
- Locker room usage will be assigned by the lifeguard in order to limit cross contamination; showers will **not** be available for use

We thank you for your cooperation and understanding with this new process. We will continue to review best practices and will make adjustments as necessary and in line with DOH and CDC recommendations.

Thank you,

Allyson Welsh, MS
Director of Wellness and Resident Services
